

BackUp Pro

Backup, Compress, Encrypt & Restore Instantly

Hard drives crash and viruses can delete important documents. It's not enough to make backup copies of important files, you need an automated solution. You need a dependable and easy-to-use software that walks you through the process of backing up your most important files.

BackUp Pro can backup your important files to multiple locations on a given schedule, compress your files, encrypt your files, and restore everything seamlessly, giving you professional-quality options without the high cost usually associated with automated remote backup solutions. BackUp Pro will take you step-by-step through the process of backing up your valuable files to any number of sources including an FTP account, email account, flash drive, external network hard drive, local area network, remote share or another local folder.

Features:

- Backup to a local folder, local drive, local area network, remote share, email address, or FTP server
- Backup entire drives, folders, or individual files
- Schedule backups daily, weekly or monthly
- Runs silently in the background
- Include or exclude certain file types
- Compress files using the ZIP format
- Encrypt files using Blowfish encryption
- Rotate backup locations, or backup to multiple locations simultaneously
- Time stamp your backups, allowing you to retain multiple backup versions
- Delete older backups to conserve valuable space.
- Utilize high-capacity free email accounts such as Yahoo, Gmail and more to store your complete backup
- Works with any FTP account, and almost any email account that is compatible with Microsoft Outlook (including free online email services)
- Built-in restoration wizard makes applying a backup easy and frustration free

BackUp Pro Users Enjoy:

Fast Automated Backups

Quickly and easily backup your data. Speed optimization and state-of-the-art compression technology ensures fast backups that save you time and money.

- Only back up what you want.
- Wizards make setting up your backups easy.

Enhanced Data Protection

BackUp Pro uses strong encryption to protect your data from theft by ensuring only you can access it. You can schedule backups to run automatically at any time without fear.

Easy Transferring and Simple Restoration

BackUp Pro provides peace of mind, ensuring that your important data is safe, secure and can be recovered in one click. BackUp Pro is compatible with all versions of Windows® so transferring files between computers is seamless and easy.

- Recover all files, groups of files, or individual files
- Insert your backup disk into your computer and you're ready to restore! BackUp Pro doesn't even need to be installed on the computer you restore your files on.

Plenty of Backup Options

BackUp Pro can store your important files or documents on any media type including CD-R, CD-R/RW, DVD, hard drives, USB drives, Zip, SuperDisk or flash drives. You can also send your compressed and encrypted backup to any email account including Yahoo, AOL, Gmail, etc. Why not use the resources of these providers to store your valuable data? BackUp Pro works automatically with Outlook™ and Outlook Express and with any POP3 email account.

Complete Control

You choose what is important: saved emails, documents, digital memories or music. You won't have to waste time and money backing up what you don't care about. You are always in complete control. BackUp Pro can backup and restore anything you'd like and can rescue your computer in one step when disaster strikes.

Purchase BackUp Pro for only \$24.95!
