

OVERSIGHT TECHNOLOGY SYSTEM SENTINEL

Full Protection Against Spyware

Oversight Technology knows that powerful PC protection isn't a luxury. Spyware, adware, and other malicious software programs are everywhere. You can be infected by visiting a website or downloading a popular software title. Something as innocent as downloading a friend's attachment can make you a victim. Once an adware or spyware program is in your system, it can download and install more programs like it. Oversight's System Sentinel is guaranteed to protect your computer better than any competitor *and* for less money.

Protect Your Privacy

Identity theft costs individuals and businesses billions of dollars each year and it's on the rise. Spyware, adware and other unwanted programs (all of which Sentinel can handle) are among the leading contributors to this problem. These vicious programs can steal your bank account information, personal information and even your social security number and driver's license. System Sentinel provides continuous protection from **data mining, aggressive advertising, parasites, scumware, key loggers, selected traditional Trojans, dialers, malware, browser hijackers, and tracking components.**

System Sentinel - Four Solutions In One

1. A complete spyware and adware removal solution guaranteed to remove all forms of malware on your PC including Trojans, keyloggers, homepage hijackers and even quite a few viruses that cause lots of problems.
2. A proactive protection solution that continually monitors everything you download and every website you browse to ensure no one sneaks anything you don't want onto your computer. System Sentinel will alert you (if you choose) or will automatically destroy the intruder.
3. Scans and optimizes your Windows registry (no need to pay \$20 for a stand-alone) to ensure your computer is clean, safe and operating at optimal speed.
4. System Sentinel learns from all other Sentinel users and the very instant it finds a brand new type of spyware or adware on anyone's computer, the main Sentinel is alerted and the program itself creates a fix. That fix is then shared with your Sentinel to prevent the newest and nastiest from reaching your PC in the first place.

OVERSIGHT TECHNOLOGY SYSTEM SENTINEL
